Special Issue

Autonomous Driving and Intelligent Routing Systems in Sustainable Future Transportation

Message from the Guest Editors

The rapid advancement in technology over the past few decades has paved the way for significant innovations in the sustainable transportation system. Among these innovations, autonomous driving and intelligent routing systems are key and are anticipated to revolutionize the way we travel and manage transportation networks with better sustainability. Autonomous driving refers to the use of artificial intelligence (AI) and advanced sensor technologies to enable vehicles to navigate and operate with less human intervention. Intelligent routing systems leverage real-time data and advanced Al algorithms to optimize traffic flow and route planning. These systems can analyze current traffic conditions, predict future congestion, and suggest the most efficient routes for vehicles. They are integral to smart city initiatives and are designed to enhance the overall efficiency of sustainable transportation networks.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
