

## Special Issue

# Sustainable Architecture, Structural Design, and Environmental Engineering

### Message from the Guest Editors

This Special Issue focuses on sustainable solutions in architecture, structural design, and environmental engineering, with a strong emphasis on bio-based materials and innovative construction methods. Key topics include the structural behavior and mechanical properties of timber and engineered wood, the development of short supply chain hardwood solutions, and the durability and reliability of bio-based materials in construction. Contributions on circular economy strategies, the lifecycle assessments of sustainable building materials, and digital advancements, such as parametric design, performance-based engineering, and building information modeling (BIM), are particularly encouraged. This Issue aims to bridge the gap between material science, structural engineering, and architectural design, addressing challenges such as fire resistance, mechanical optimization, and large-span timber structures. By supplementing the existing literature, it will provide a technical foundation for advancing sustainable construction methods, ensuring resilience, efficiency, and compliance with environmental standards.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

---

### Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario  
Institute of Technology, Oshawa, ON L1G 0C5, Canada

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
