

## Special Issue

# Sustainable Water Resources Management and Water Supply

### Message from the Guest Editors

Dear Colleagues: This Special Issue aims to address “Sustainable Water Resources Management and water supply.” To this end, we are seeking articles that address problems, challenges, opportunities, tools and technologies, development, and management related to the sustainability of water resources in urban, rural, desert, and mountainous areas and water sources. Potential topics include (but are not limited to):

- Water availability
- Water balance
- Water resources development
- Water supply management
- Water demand management
- Water wastage
- Impact of climate change on water use
- Water supply distribution
- Rainwater harvesting
- Impact of urbanisation and industrialization on water resources management
- Ground and surface water quality and quantity
- Surface and ground water interactions
- Political and socio-economic challenges in water management and water supply
- River rejuvenation
- Developments in water use and reuse methods
- Tool and techniques for water management and water supply
- Water recycling, Water reuse

---

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
