

Special Issue

From Agricultural Pollution to Ecosystem Restoration: Pathways Toward Sustainability

Message from the Guest Editor

This Special Issue focuses on the assessment of ecosystem pollution driven by anthropogenic activities, as well as on remediation, restoration, and sustainable environmental management strategies. The scope includes ecosystems, both terrestrial and aquatic, emphasizing pollutant sources, fates, and transport pathways; possibilities for bioavailability, bioaccumulation, and biomagnification; and interactions between soil, sediment, and water. By adopting an integrated ecosystem-based approach, this Special Issue aims to improve understanding of cumulative and long-term impacts of agricultural pressures on ecosystem functioning and resilience. Particularly encouraged are contributions that address the monitoring and modeling of (agricultural) pollution, the evaluation of innovative remediation techniques (such as bioremediation, phytoremediation, and nature-based solutions), and the implementation of sustainable agricultural and land management practices. This Special Issue also focuses on the development of sustainability indicators, decision-support tools, and assessment frameworks that facilitate evidence-based management and policy-making.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
