

Special Issue

Future-Proofing Maritime Logistics and Port Management: Sustainability in the Era of Tech Innovation, Climate Goals, and Global Disruption

Message from the Guest Editor

The maritime and logistics sectors are foundational to global trade and economic development. Their operations directly influence the achievement of the United Nations' 17 Sustainable Development Goals (SDGs), particularly in areas such as climate action (SDG 13), life below water (SDG 14), decent work and economic growth (SDG 8), industry, innovation and infrastructure (SDG 9), and responsible consumption and production (SDG 12). These sectors are not only enablers of sustainable development but also bear significant responsibility for mitigating environmental impacts and promoting inclusive growth. Considering the increasing complexity and urgency of sustainability challenges, this Special Issue seeks to encourage interdisciplinary research that addresses both current and emerging issues in sustainable maritime and logistics management. We encourage submissions from various disciplines including maritime economics, logistics management, supply chain management, operations research, public policy, and international relations.

Guest Editor

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
