

Special Issue

Current Advances in Green Governance and CO₂ Emissions towards Sustainable Development

Message from the Guest Editors

As COVID-19 has negatively impacted the global economy, environmental issues surrounding climate change have had to be suspended from the public interest due to the severe economic crisis. In order to achieve the impossible mission of carbon net-zero society, environmental policies should be 'transparent, measurable, and predictable'. Therefore, this Special Issue aims to develop the feasibility of a net-zero society from a country level, industry level, and even for individual company level. In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: Environmental regulations evaluation toward the net-zero society; Regional cooperation for the sustainable development or green growth; Innovative case studies for the sustainable low-carbon innovation with the unique contents of implications and suggestions; The economic impact coming from the Emission Trading Scheme (ETS) or environmental regime; New methodological, or conceptual approaches for sustainable governance in the post-COVID-19 era; Other related issues on the net-zero society in the region or industry.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
