

# Special Issue

## Ecological Transition in Economics

### Message from the Guest Editors

The purpose of this Special Issue is threefold. First, it aims to advance our understanding of how sustainability can be defined, quantified, and operationalized in economic frameworks through multidimensional indicators, integrated modeling, and real-world case studies. Second, it highlights policy instruments, legal frameworks, and governance mechanisms necessary to steer markets and societies toward a low-carbon, resource-efficient, and socially just future. Third, it illustrates practical tools and applications that can measure and monitor sustainability performance, ranging from life cycle assessments and carbon accounting to participatory decision-making processes. By gathering cutting-edge research in these areas, the Special Issue will provide actionable insights for scholars, policymakers, and practitioners committed to an inclusive and resilient economic transition. Ultimately, these contributions will enrich the ongoing global dialogue on how economics can become a transformative force for ecological well-being, thereby supporting *Sustainability's* broader mission of advancing equitable and science-based sustainable development.

### Guest Editors

Dr. Chun-Chih Chen

Department of International Business, National Taichung University of Science and Technology, Taichung City, Taiwan

Prof. Dr. Hsiao-Tien Pao

National Yang Ming Chiao Tung University, Hsinchu, Taiwan

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
