

Special Issue

Ecological Transition in Economics

Message from the Guest Editors

The purpose of this Special Issue is threefold. First, it aims to advance our understanding of how sustainability can be defined, quantified, and operationalized in economic frameworks through multidimensional indicators, integrated modeling, and real-world case studies. Second, it highlights policy instruments, legal frameworks, and governance mechanisms necessary to steer markets and societies toward a low-carbon, resource-efficient, and socially just future. Third, it illustrates practical tools and applications that can measure and monitor sustainability performance, ranging from life cycle assessments and carbon accounting to participatory decision-making processes. By gathering cutting-edge research in these areas, the Special Issue will provide actionable insights for scholars, policymakers, and practitioners committed to an inclusive and resilient economic transition. Ultimately, these contributions will enrich the ongoing global dialogue on how economics can become a transformative force for ecological well-being, thereby supporting *Sustainability*'s broader mission of advancing equitable and science-based sustainable development.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
