

## Special Issue

# Emergency Management and Disaster Perceptions: Revisiting Attitudes and Behaviors in an Era of New Hazard Agents and Profiles

### Message from the Guest Editors

The last two decades of hazards and disasters scholarship have made considerable advances in our understanding of risk perceptions, attitudes, and resulting behavior. The application and refinement of foundational decision-making and warning models and frameworks, in addition to the emergence of newer ones, have enriched knowledge and understanding of behavior and decision-making in response to natural and human-induced hazards and risks. However, the unprecedented changes to social dynamics, the disaster landscape, and challenges presented to emergency management over the past several years necessitate a fresh investigation into risk perception theories and the implications of behavioral models/theories on emergency management and disaster science. We invite you to contribute your research on this to the Special Issue of Sustainability. We welcome articles on a diversity of topics which take fresh looks at risk perceptions, protective action decision making, and emergency management. Additionally, we welcome research articles which utilize a variety of data and methodologies, including quantitative, qualitative, and mix-method approaches.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
