# **Special Issue**

# Towards a Sustainable Future: Tackling Food Waste at the Household Level and in the Working Environment

# Message from the Guest Editor

The aim of this Special Issue is to provide better insights into the (daily) circumstances under which people in households and in work environments waste food, as well as the strategies, challenges, and success factors that can lead to reductions in their food waste. Our overall aim is to increase our knowledge of how and why specific groups waste food and in what daily realities they do so. We are also interested in understanding successful strategies to try and reduce food waste. In this Special Issue, research areas may include (but are not limited to) the following:

- Daily realities and environments that enable or hinder reductions in food waste:
- Food waste reduction strategies employed by specific groups of consumers and/or people in working environments:
- Difficulties around reducing food waste by specific groups of consumers and/or people in working environments;
- Insights into food waste behavior and attitudes towards food waste;
- Evaluations of intervention strategies and projects by government, other public bodies, and working environments to reduce food waste.

We look forward to receiving your contributions.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
