

Special Issue

Food Processing, Characterization, Treatment, and Conversion of Waste to Value

Message from the Guest Editors

Due to the global problem of food wastes, there is a great deal of attention paid to their processing and recycling into useful products. These wastes have diverse compositional characteristics because they are produced at different generation stages or from different sources, and consequently can be used for recycling into various products. Considering the urgent demand for a circular economy and sustainable actions, research has been providing the first steps towards finding new and greener extraction systems for food wastes with the outlook of recovering bioenergy or value-added products. This Special Issue seeks manuscript submissions that further our understanding of these techniques and on the utilization of these wastes in valuable specialty products. Studies that deal with new valuable resource technologies, biorefineries, and technoeconomic analysis are highly desirable. Submissions on new processing and extraction methodologies that employ green approaches, with a smaller environment impact than conventional strategies are also very welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
