

Special Issue

Environmental Sustainability as a Fundamental Contribution to the Mitigation of Climate Change

Message from the Guest Editors

This Special Issue is devoted specifically to the environmental pillar of sustainability. Other pillars on economic and social aspects are not included. A basic contribution of environmental sustainability to the mitigation of global warming is the replacement of non-renewable energy sources with sustainable energies. These energies include renewables and also energy efficiency. The scope of this Special Issue is very wide, since all types of natural resources (if they are sustainable) and of mitigation measures for global warming can be considered. Its main purpose is to provide information based on scientific research on the subject of the title of the present Special Issue. This Special Issue will usefully supplement the existing literature, where studies are usually disconnected, since there is a large number of journals, books, etc., devoted to sustainable energies and on the other side to climate change, but they are not integrated and normally they do not include greenhouse gas emissions inventories and how these contaminant gases can be reduced.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
