

Special Issue

Digital Wellbeing and Sustainability

Message from the Guest Editor

Promoting sustainability and the wellbeing of all actors in society are key global policy priorities. Digital wellbeing spans the impact of technologies and digital services on people's mental, physical, social, and emotional health. Sustainability involves promoting and facilitating the everyday conduct of individuals, businesses, and nations in such a way that does not negatively impact our environment, community, or society as a whole. This Special Issue will edit articles from experts working on research spanning the breadth of sustainability considerations linked to digital technologies, communications networks, digital wellbeing, policy making and regulation in electronic communications. This collection is intended to inform and advance academic and policy understanding of these pressing modern-day phenomena, and to bolster the adoption and embedding of sustainability efforts and social wellbeing in the area of digital technologies. We look forward to receiving your contributions in this important research area.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
