

Special Issue

Advances and Challenges in the Sustainable Water Management—Second Edition

Message from the Guest Editors

At present, new methods for water management are being researched, and the currently used methods are optimized in all economic sectors in order to efficiently use the available water resources. It is best to close water cycles or to recycle water using highly efficient waste treatment technologies. Sustainable water management, which is crucial for the protection of water resources and the reasonable use of water, should consider the requirements of ecosystems. Therefore, strategies for water resource management and planning aspects are very important to solve the water problem around the world. This Special Issue explores cross-disciplinary approaches, methodologies, and applications of sustainable water resource management. This Special Issue invites researchers in environmental protection, environmental engineering, civil engineering, spatial planning, geography, and other disciplines and cross-disciplinary fields.

Guest Editors

Prof. Dr. Mariusz Sojka

Department of Land Improvement, Environmental Development and Spatial Management, Poznań University of Life Sciences, Piątkowska 94E, 60-649 Poznań, Poland

Dr. Dariusz Młyński

Department of Sanitary Engineering and Water Management, Faculty of Environmental Engineering and Geodesy, The University of Agriculture in Krakow, 30-059 Krakow, Poland

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
