

Special Issue

Sustainability in Fashion and Textiles

Message from the Guest Editors

This Special Issue focuses on the importance of sustainability in textile and garment processing, from fiber to garment manufacturing. In general, the textile industry creates significant climate changes during production, from fiber to finished garments. In this Issue, special attention will be given to sustainable textiles and fashion in five different phases of product life cycles (material, manufacturing, retail, consumption, and disposal phases). Further attention is given to social responsibility, green supply chain management, and eco-design in the textile/fashion sectors. This Special Issue aims to collect research papers that examine how these divergent issues could be addressed.

In this Special Issue, the focus will be on the latest knowledge and innovations in the field of sustainable textile and garment industry. The research papers should report the theoretical background, methodology, results, analysis, and implications for applications of the outcomes to make a meaningful impact that addresses the knowledge gaps related to the scope of the Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
