Special Issue

Fisheries from the Perspective of Sustainable Development

Message from the Guest Editors

Over the past few decades, the evolution of technologies to enhance fishing harvests, such as improving fishing efficiency and developing more efficient fishing gear and methods, has resulted in a reduction in global fishery resources and the destruction of marine ecosystems (Worm et al., 2009). In the United Nations Sustainable Development Goals (SDGs), oceanrelated issues are independently listed as SDG 14, but ocean sustainability and other aspects of sustainable human development are intertwined and complex. Marine capture fishery is an industry that has the greatest impact on coastal people in the traditional utilization of the ocean, thus marine capture fishery must also consider the harmony of environment. society, and economic development to enhance sustainability. To this end, developing sustainable fisheries is a relatively critical activity necessary for coastal populations to achieve a sustainable livelihood. This Special Issue will provide an overview of the most recent advances in the field of the sustainable development of fisheries and their applications in diverse areas.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
