# Addressing the Food–Health–Environmental Nexus for Agri-Food System Sustainability

### Message from the Guest Editors

Dear colleagues, The environmental impacts of mainstream agri-food systems are relatively well understood and include climate change and contamination, pollution, and degradation of natural resources, which generate effects on the biophysical system, via multiple and interconnected pathways. Those rooted interactions are associated with impacts on human health, i.e., the food–health–environment nexus, in the words of the International Panel of Experts on Sustainable Food Systems (IPES Food). Health risks are highly diverse and mutually reinforcing, including the exposure of farmers and farm workers to contaminants and pollutants in the workplace and of the public in the surrounding environment, as well as the consumption of unsafe and unhealthy food by whole populations. Poor living conditions and poverty can intensify the severity and prevalence of negative health impacts, by increasing people’s vulnerability, which makes the food–health–environment nexus an area of growing attention and concern. For further reading, please visit the [Special Issue Website](#).

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
