Special Issue

Food Innovation for Planetary Health

Message from the Guest Editors

The food we eat has a significant impact on human and population health and the state of the ecological systems of the planet. In 2019, the EAT-Lancet Commission pointed out that poor diets are posing a greater risk to morbidity and mortality than unsafe sex. alcohol, drug, and tobacco use combined. We need to reduce the harm caused and promote better ways of producing, distributing, and consuming food. This transformation has to spread from the level of ingredients to the entire food system that needs to reflect the reality and priorities of the 21st century. This Special Issue calls for submissions related to innovations in the area of food production, distribution. and marketing, concerning the following: the current ecological footprint of food, maintaining soil fertility. preventing further deterioration of planetary health, assisting in improving human health, utilizing the latest scientific and technological advances, making foodrelated systems more sustainable and just, reducing animal exploitation, and preventing the emergence of new zoonotic diseases. Interdisciplinary and transdisciplinary approaches are particularly encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
