

Special Issue

Food Quality, Price and Consumer Choices

Message from the Guest Editors

Quality labelling consist of cues used by consumers to access food quality and assist consumers in making informed food choices while retaining freedom of choice, and reducing search costs. For food producers, quality labelling is one of the major instruments to differentiate their products by informing consumers about credence quality attributes. Quality labels thus provide opportunities to strengthen their competitiveness by offering a way to differentiate and communicate the nature of their products in the marketplace. Quality labelling will be traded-off against other informational cues on the package, as well as price when consumers make food choices. This special issue is focused on the quality labels, price and how it relates to food choice. Keywords

- Consumer food choice behavior
- Food quality labeling
- Preferences
- Willingness to pay
- Credence attributes
- Food Marketing
- Consumer Economics

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.
