

## Special Issue

# Food Quality, Price and Consumer Choices

### Message from the Guest Editors

Quality labelling consist of cues used by consumers to access food quality and assist consumers in making informed food choices while retaining freedom of choice, and reducing search costs. For food producers, quality labelling is one of the major instruments to differentiate their products by informing consumers about credence quality attributes. Quality labels thus provide opportunities to strengthen their competitiveness by offering a way to differentiate and communicate the nature of their products in the marketplace. Quality labelling will be traded-off against other informational cues on the package, as well as price when consumers make food choices. This special issue is focused on the quality labels, price and how it relates to food choice. Keywords

- Consumer food choice behavior
- Food quality labeling
- Preferences
- Willingness to pay
- Credence attributes
- Food Marketing
- Consumer Economics

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
