## **Special Issue**

# Food Security and Ecosystem Services

## Message from the Guest Editor

Ecosystem services (ES) are the benefits people obtain from ecosystems. In agriculture, ES are poorly exploited for food security. Innovation should aim for use efficiency, a safe environment, and local adaptation, while tackling the major food security challenges in the world which remain underinvestigated. It is necessary to properly identify and address the linkages between ES and food security without overlooking co-production, trade-offs, gender, and cultural services, which are often disregarded in research. Furthermore, local food security both affects and is affected by global food security. Finally, the multi-dimensional nature of food security demands that research gives equal importance to its socio-economic and environmental aspects.

This Special Issue seeks to contribute to the ES and food security agenda through enhanced scientific and multi-disciplinary knowledge, in order to examine interactions between themes such as crop resource use efficiencies and to include all production and non-production aspects of food security and ES in future roles for integrated assessment models.

## **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

## Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
