

## Special Issue

# Sustainable Food Waste Management

### Message from the Guest Editor

The increase in global food loss or waste is one of the greatest challenges in promoting resource efficiency and sustainability. Population growth, urbanization and globalization may increase food demand, effectively leading to increased food losses and waste. Therefore, action is needed to ensure that food is managed sustainably at all stages of its life cycle.

This special issue of “Sustainable Food Waste Management” is intended to explore, develop and propose strategies and mechanisms to address food waste management challenges and trade-offs, taking into account life-thinking considerations. By identifying food-waste challenges and generating the evidence needed to support decision-making by prioritizing policies and measures, new scientific research from around the world will be very useful to highlight what the problem is and how we can address it. - Manufacturing.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
