# **Special Issue**

# Forest Ecology and Management for Climate Sustainability and Anthropogenic Environmental Threats

# Message from the Guest Editor

The combined risks of human activity and climate change have great potential to alter forest ecosystem dynamics by impairing the balance of carbon and water, and the ecosystem services it underpins, and becoming the basis for climate change adaptation. The most sustainable freshwater resources, characterized by the highest quality, originate from forest ecosystems. This Special Issue compiles high-quality research works and review papers pointing to early warning indicators and presenting strategies and management and that support the mitigation of civilization threats in the sustainable use of forest ecosystem services and their application, especially in regards to water resources at different scales Theoretical, methodological and case study papers are welcome.

# **About the Journal**

# Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

# Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

### **Author Benefits**

# Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

# **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

## Journal Rank:
