

## Special Issue

# Freshwater Resources and Ecosystems in the Anthropocene: Challenges for a Sustainable Management

### Message from the Guest Editors

In this new era, freshwater ecosystems are greatly exposed to risk as anthropogenic activity continuously promotes the alteration of hydrological regimes. Given the anticipated impacts of climate and land-use changes on the global water resources, it is apparent that anthropogenic pressure on freshwaters will increase in the next few years, which increases the need to adapt current freshwater management and/or create new schemes that will ensure a sustainable use of freshwater resources.

This Special Issue welcomes innovative research studies from various disciplines that focus on the impact of anthropogenic disturbances on freshwater ecosystems and resources in the scope of sustainable water management.

- Climate change impacts on freshwater ecosystem functions and services
- The effects of catchment landscape and land-use changes on the water quality, quantity, and availability of water resources
- Modeling the responses of freshwater ecosystems to scenarios of global change and future management
- New tools and methods for monitoring and quantifying the impacts of anthropogenic changes on freshwaters

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1  
(Geography, Planning and Development)
