

Special Issue

Frontiers in Soil Management and Environment Sustainability in Sustainable Agriculture and Forestry

Message from the Guest Editors

Managing soil properties includes protecting the soil structure necessary for agricultural and forest production and applying agricultural, silvicultural, and processing techniques to increase the long-term efficiency of the soil. Sustainable farming reduces pollution by using natural fertilizers and using fewer chemicals. This means that farm produce is healthier and better for people. Even the waste produced by sustainable farming goes back into the farm's ecosystem and does not pollute the environment. Soil and environment management is important, both directly and indirectly, to crop productivity, environmental sustainability, and human health.

This Special Issue aims to enlarge the present knowledge related to soil management and environmental sustainability in sustainable agriculture and forestry. Innovative research on technologies and methodological approaches are welcomed. The discussion of case studies, as well as of experimental work is encouraged.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
