

Topical Collection

Towards the Full Inclusion of Waste Management into Circular Economy

Message from the Collection Editors

Sustainable waste management and the recovery of materials from waste (recycling) is one of the pillars of the circular economy, but many waste management processes and technologies can be still considered in their infancy, and in many countries waste management is still mainly based on disposal in uncontrolled landfills and open dumps. We invite you to join this Special Issue to share your vision for novel processes aimed at converting waste (e.g., municipal waste, biodegradable industrial waste, wastewater sludge) into chemicals, secondary raw materials, biofuels, and energy. Papers dealing with innovations in landfill construction and management having the objective of sustainably disposing of residual waste are also welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
