

Special Issue

Fungal Diversity and Sustainability

Message from the Guest Editor

This Special Issue of Sustainability focuses on fungal diversity and functions in various environments from natural ecosystems to human-related environments. We encourage all type of studies such as comprehensive reviews, case studies, or research articles. Some of the potential topics include:

- Fungal diversity in various environments (e.g. soil, rhizosphere, bio-aerosol, marine ecosystem, and animal gut)
- Environmental drivers associated with diversity and species assembly patterns
- Anthropogenic impacts on fungal diversity
- The response of fungal physiology or functions following environmental changes
- Enzyme activity
- Function and ecosystem service
- Bioremediation and degradation of pollutions and wastes
- Bio-monitoring and survey methods

Guest Editor

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
