# Future of Agriculture and Rural Regions from a Perspective of Sustainable Development

## Message from the Guest Editors

Sustainable agriculture is indisputably one of the main goals of various Governments. However, the balance between green ambitions and production levels is debatable. Agricultural sector assures food security, provides decent jobs in rural regions, maintains biodiversity, assures proper landscape management practices, slower rural-urban migration and etc. Its importance has been reassessed during the disruptions to various food supply chains caused by Covid-19 pandemic. The paradigm of sustainable development, the Green Deal, a strong agri-environmental ambition open up opportunities and challenges for agriculture and rural vitality, resilience and competitiveness of the agricultural sector. The smooth transformation of the sector is difficult to imagine without government intervention. Governments all over the world have implemented various support measures in order to assure sustainable operations of agricultural sectors. This included not only administrative, legal or social but the financial incentives too.

# **About the Journal**

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

### Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

#### **Author Benefits**

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
