

Special Issue

Future of Built Environment Seen from the Lens of Sustainability Science

Message from the Guest Editor

This special issue is focused on addressing the significant problems related to the development and design of sustainable built environment from all aspects of sustainability science. It covers many different topics and issues, including unintended environment impact of current sustainable design/ build practice, integration of natural ecosystem and built infrastructure, modelling and planning carbon neutral city, renovating existing buildings and infrastructure to meet carbon neutral goal, embodied energy and environmental impact, policy and regulation that promote sustainable built environment development. An important focus of special issue is exploring a more comprehensive a built environment development framework that go beyond current energy-centric approach. Empirical studies, theatrical development and case studies in all domains of sustainable environment design are all welcomed.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
