

Special Issue

Governance and Sustainability: Future Perspective for Business, Economy and Society

Message from the Guest Editor

At present, a growing number of institutional investors have realized that environmental, social, and governance performance has become financial in the long run. Therefore, investors have started to give more importance to investigate the link behind nonfinancial information, including environmental, social, and governance disclosures, to understand the connections of companies with both risks and opportunities. Along with this trend, it has become even more important and necessary for companies to create value for all stakeholders and to share information about their value creation process with their investors and other stakeholders. This Special Issue will become a major reference on sustainability and corporate governance with related scope. Additionally, this issue is intended to be a preferred publication not only for scholars but also for practitioners, consultants, and leaders engaged with sustainability and corporate governance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
