

Special Issue

Future Challenges of Sustainable Cities: Maintenance and Improvement of Public Health System

Message from the Guest Editor

Our world is rapidly urbanized. More than half the world's population has been living in cities since 2007. Cities are powerhouses of economic growth. However, they contribute about 70 per cent of global carbon emissions and over 60 per cent of resource use. Such urbanization results in a growing number of inadequate and overburdened infrastructure and services, worsening air pollution and unplanned urban sprawl. This Special Issue aims to publish high-quality manuscripts on the transdisciplinary research related to effects of public health system (such as transportation, air conditioning, waste collection, water and sanitation systems) improvement or malfunction on human health in cities and metropolitan areas.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
