

Special Issue

The Future of Cities and Lands Seen from the Perspective of Digital Sustainability

Message from the Guest Editors

Whether starting from the environment, society, or the economy, it is now clear that all these areas are closely linked, interconnected, and interdependent. The construction of a sustainable future depends on our ability to balance resources in the best possible way in order to build a development model that puts human beings at the center, while respecting the environment in which they live and which they will leave to their descendants. In this context, technology, and in particular digital technology, plays a fundamental role, made even more delicate by the fact that it is both the subject and the object of the development process. Technology is used to bring about change in the economy, society, and the environment, defining its development paths in a system of interdependencies between it and the phenomena it determines and which, in turn, determine it. From this perspective, the Special Issue encourages the scientific society to explore and reflect on the outcomes and opportunities of this multifaceted scenario. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
