

## Special Issue

# Accelerating Sustainable Innovation Through ESG Integration: Driving Value Creation and Social Impact in Firms

### Message from the Guest Editors

The integration of environmental, social, and governance (ESG) considerations into business practices has emerged as a critical driver of sustainable innovation and value creation. As firms increasingly recognize the importance of aligning their strategies with ESG principles, there is a growing need for research exploring the theoretical foundations, practical applications, and impact of ESG-driven innovation. This Special Issue aims to advance the discourse concerning how firms can accelerate sustainable innovation by integrating ESG factors into their decision-making processes, product development, and organizational practices. We invite contributions that investigate the relationship between ESG and innovation, with a focus on how this integration can create both business value and positive social impact. For more information please check [https://www.mdpi.com/journal/sustainability/special\\_issues/G06846U5SN](https://www.mdpi.com/journal/sustainability/special_issues/G06846U5SN) We look forward to your contributions to this timely and important Special Issue.

## About the Journal

### Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
