Accelerating Sustainable Innovation Through ESG Integration: Driving Value Creation and Social Impact in Firms

Message from the Guest Editors

The integration of environmental, social, and governance (ESG) considerations into business practices has emerged as a critical driver of sustainable innovation and value creation. As firms increasingly recognize the importance of aligning their strategies with ESG principles, there is a growing need for research exploring the theoretical foundations, practical applications, and impact of ESG-driven innovation. This Special Issue aims to advance the discourse concerning how firms can accelerate sustainable innovation by integrating ESG factors into their decision-making processes, product development, and organizational practices. We invite contributions that investigate the relationship between ESG and innovation, with a focus on how this integration can create both business value and positive social impact. For more information please check https://www.mdpi.com/journal/sustainability/special_issues/G06846U5SN We look forward to your contributions to this timely and important Special Issue.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA
