Special Issue

Impact2030 Initiative: Impacts of Action on SDGs

Message from the Guest Editor

The 2030 Agenda for Sustainable Development was adopted by 193 countries in September 2015 with the goal of achieving before 2030 the 17 Sustainable Development Goals (SDGs) that represent the major challenges humankind must face in terms of society. economy, environment and governance. Progress towards the SDGs is monitored by a set of 231 indicators that are assessed periodically. In this vein, a wide range of tools, frameworks and systems have also been developed in addition to the SDG indicators to provide data to be reported through global initiatives led by United Nations, such as the SDG Index and Dashboard Report released yearly. Although the evaluation of the SDGs is an issue that has been addressed, positive and negative impacts caused by the implementation of the 2030 Agenda pose a pending question to be examined by academia. Aiming to bridge this gap, this Special Issue calls for relevant contributions in the field of sustainability that analyse how this global initiative has impacted society, the economy, the environment and institutions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University, Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
