

Special Issue

Sustainability in the Modern Workplace: Insights from Industrial–Organizational Psychology

Message from the Guest Editors

Our aim for this Special Issue is to draw together a collection of high-quality, research-driven, theory-informed, and/or professional-experience-oriented manuscripts reflecting the evolving landscape of I-O psychology, addressing sustainability issues and current societal and organizational challenges while advancing the field through innovative research methodologies and broader analytical perspectives. The Special Issues advocates for more theoretical research, conceptual studies, and empirical investigation on how organisational management, talent acquisition and high-performance sustainable work practices can impact organisational financial outcomes, business objectives, and overall value creation. Advances in research in exploring how Industrial-Organizational (I-O) Psychology plays a crucial role in promoting sustainability within organizations is gaining traction. The Special Issue, therefore, aims to explore how incorporating these principles and practices can help I-O psychologists in organizations achieve sustainability goals while enhancing employee well-being, organizational efficiency, and overall performance.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief
