

Special Issue

Air Quality Modelling and Forecasting towards Sustainable Development

Message from the Guest Editors

This Special Issue aims to reveal the most recent findings on new approaches or improved versions for estimating, modeling, and forecasting local or regional air pollution. Additionally, urban areas with dense populations are more prone to serious effects of air pollution; hence, studies related to forecasting urban air quality are encouraged. Furthermore, predicting the spatiotemporal behavior/prediction of air quality is of interest in this Issue. Discussion relating to the association of atmospheric pollution and specific Sustainable Development Goals (SDGs) is highly sought, as it helps policymakers to develop pollution-reduction policies.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
