

Special Issue

Current Movement in Sustainable Urban Mobility

Message from the Guest Editors

Traffic congestion, safety of vulnerable road users, and greenhouse gas emissions have become serious concerns in the urban centers of populated cities. Individual use of cars, particularly for short-distance trips, may largely contribute to such issues. Sustainable modes of transport are being encouraged and promoted in many cities around the world as a strategy to mitigate the negative effects of personal automobile use. In general, any form of eco-friendly or green transportation is referred to as sustainable transportation. Sustainable means of transportation can offer numerous social, economic, and environmental benefits, e.g., alleviating traffic congestion by reducing the use of single-occupancy vehicles, enhancing safety, reducing greenhouse gas emissions, encouraging active lifestyles, improving health and social connections in urban environments, and so on. This Special Issue aims to discuss and advance the body of knowledge related to the current trends in sustainable urban mobility.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
