

Special Issue

Sustainable Governance in Urban Regeneration

Message from the Guest Editors

This Special Issue aims to investigate the role of sustainable governance in green urban regeneration within the broader challenges posed by the SDGs. Urban green policies can contribute to employment growth, urban attractiveness, the local production of green goods and services, and urban land values. Links can be fostered between urban and rural areas to boost a region's economic potential. There is also a need to design urban policies that complement global climate policies and reduce the overall cost of emission reduction. Urban policy makers can use this opportunity to foster green growth and discuss the factors that may affect their policy choices and scope of action, including national policies. Furthermore the importance of urban renewable energy investments, the public acceptance of such investments, and the economic viability are issues of interest. Therefore, original research articles as well as relevant state-of-the-art reviews are kindly invited for submission to this Special Issue of *Sustainability*.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
