

## Special Issue

# Sustainable Governance in Urban Regeneration

### Message from the Guest Editors

This Special Issue aims to investigate the role of sustainable governance in green urban regeneration within the broader challenges posed by the SDGs. Urban green policies can contribute to employment growth, urban attractiveness, the local production of green goods and services, and urban land values. Links can be fostered between urban and rural areas to boost a region's economic potential. There is also a need to design urban policies that complement global climate policies and reduce the overall cost of emission reduction. Urban policy makers can use this opportunity to foster green growth and discuss the factors that may affect their policy choices and scope of action, including national policies. Furthermore, the importance of urban renewable energy investments, the public acceptance of such investments, and the economic viability are issues of interest. Therefore, original research articles as well as relevant state-of-the-art reviews are kindly invited for submission to this Special Issue of *Sustainability*.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
