

Special Issue

Build It Green—Sustainable Structural and Environmental Studies

Message from the Guest Editors

The idea of sustainability and sustainable structures considers the health of the occupants and users by reducing the environmental load. The idea of sustainability aims to reduce energy consumption and pollution, and by achieving that, the environment and people's health are protected. Thus, different types of structural systems should be designed following sustainable strategies like energy efficiency. The aim is to construct structures both technically accurate, e.g., in the case of an earthquake action, and viable for the environment. The aim of this Special Issue is to encourage researchers to publish their original research and review articles in the field of sustainability and related engineering structures under various types of loading, including seismic action.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
