

Special Issue

GIS in Water Resource Management: Allocation, Contamination, and Ecosystem

Message from the Guest Editors

The aim of this special issue is to integrate the latest progress and achievements of theories, methods and techniques of GIS that is applied in water resource management.

- GIS-based monitoring and disposal of water resources management
- GIS based innovation of water pollution treatment technology
- GIS-based temporal and spatial evolution of water resources management
- GIS-based resources & environmental impact assessment of water resources management
- GIS-based socio-economic impact analysis of water resources management
- GIS-based conflict analysis of water resources management
- GIS-based non-/cooperative governance policies of water resources management
- GIS-based non-/cooperative management mechanisms of water resources management
- GIS-based assessment and optimization of water ecosystem services
- GIS-based planning and governance of ecological spatial pattern
- GIS-based construction and operation of ecological compensation mechanism
- Various GIS-based case studies

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
