

## Special Issue

# Progress in Sustainable Smart Tourism: Planning, Developing, Management and Sustainability

### Message from the Guest Editors

Smart tourism is an innovative type of tourism as it provides smart technology applications for tourists' on-site experiences (i.e., AR, VR, MR, and intelligent guide systems); however, limited research exists on it. Sustainable tourism requires us to understand the effects of all planning, development, and management on sustainability. This Special Issue aims to present a wide range of papers elucidating cutting-edge progress in sustainable smart tourism relevant to planning, development, management, and sustainability perspectives. We welcome papers that develop state-of-the-art methods for assessing the cutting-edge progress in smart tourism, new frameworks for theoretical or practical implications, and approaches for monitoring economic, socio-cultural, or environmental perspectives with a view of smart tourism to promote sustainable tourism. This Special Issue will elucidate up-to-date, high-quality, international, multidisciplinary, and valuable insights to support smart tourism development, potentially contributing to the literature.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.
