

## Special Issue

# Role of Green Solvents in Nanomaterials and Technology Development

### Message from the Guest Editors

Green solvents are essential for the development of nanomaterials and nanotechnology because they can provide a more cost-effective and sustainable alternative to traditional organic solvents, and reduce the environmental impact of production processes. Additionally, green solvents may be used to create nanomaterials with specific properties, such as improved solubility, higher purity, and increased stability. Green solvents are also crucial for the safe handling of nanomaterials and technologies. This Special Issue solicits manuscript submissions on the state-of-the-art of the most recent advancements in the applications of ionic liquids and deep eutectic solvents on thermophysical properties and characterization, catalyst applications, gas capture and separation, battery applications, novel electrolytes, water treatment and purification and other related applications including both experimental and theoretical studies. We look forward to receiving your contributions.

# About the Journal

## Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

## Author Benefits

### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

### High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1 (Geography, Planning and Development)
