The Role of Wastewater Management and Treatment Technologies for Environmental Sustainability

Message from the Guest Editors

By 2050, the global population is expected to increase by 32%. This increase in population, urbanization and industrialization alongside the changing climatic conditions will coincide with a rise in water demand and the production of wastewater. Comprehensive and sustained wastewater management is central to improved human health, food security, economic development, energy efficiency, an improved water footprint, the creation of jobs and poverty reduction. Therefore, novel technology ensuring efficient and effective wastewater management can play a pivotal role in environmental sustainability.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
