

Special Issue

Gaps and Opportunities in Addressing Food Insecurity under the Sustainable Development Framework

Message from the Guest Editors

The United Nations has put 2030 as the target to end hunger and all forms of food insecurity. To achieve that, countries have been prompted to intensify the assessment of food insecurity prevalence and design actions across the food supply chain to ensure access to sufficient and healthy food for all. Assessing acute hunger and milder forms of food insecurity, building resilient food systems, reducing food waste, and ensuring easy access to food by connecting local producers to potential buyers are among some of the actions needed to avert a humanitarian crisis and continue to progress towards that 2030 target. This Special Issue invites contributions in the field of food insecurity and sustainability. Studies in assessing the nutritional gap of at-risk populations (immigrants, correctional facilities, institutionalized populations), studies in the field of food waste reduction, food by-product utilization as a functional ingredient, intervention studies, and studies/perspectives on the creation of new food systems as welcome.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
