

Special Issue

Artificial Intelligence and Mobile Technologies for Sustainable Development of Smart Regions

Message from the Guest Editors

Smart regions, which include smart cities, villages, and natural spaces, are an integrating concept that is a key component in the sustainable development of countries and a very important trend in the improvement of the modern world and the development of humans. Smart cities and regions should ensure comfort and safety/security for its inhabitants and provide various services based on information and communication technologies, artificial intelligence, and mobile systems (e.g., UAV, robotics, and autonomous transport), among others. This Special Issue aims to gain insights into the development of holistic methodologies and technologies for the sustainable development of smart cities and regions. We welcome articles that propose efficient ideas and solutions for smart ecosystems, as well as intelligent mobile information and communication technologies, targeted at the creation and implementation of safe and high-quality services for smart regions.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in Sustainability, an international open access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. The journal publishes original research articles, reviews, conference proceedings (peer reviewed full articles) and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Steve W. Lyon

School of Environment and Natural Resources, Ohio State University,
Columbus, OH 43210, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
