Special Issue

Green Supply Chain: Business Process and Logistics Management

Message from the Guest Editors

Recently, increasing regulatory force, scarcity of natural resources and environmental turbulence have encouraged companies to continuously innovate and change to achieve sustainable development.

Sustainable supply chains have become one of the hot topics. A sustainable supply chain helps with the strategic, transparent and circular realization of companies' economic, environmental and social performance in the coordination of business process and logistics management. The Special Issue pays attention to the development trends and hot spots of sustainable supply chains and the relevant research and discussions around improving business process and logistics management. Potential topics include, but are not limited to, the following:

- Conceptual model of sustainable supply chain;
- Business process of sustainable supply chain;
- Logistics management of sustainable supply chain;
- Sustainable supply chain driven by digital transformation:
- Digital technology and business process improvement;
- Standardized logistics management practices;
- Supply chain resilience;
- Other related research topics.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen
