

Special Issue

Advances in Climate and Energy Economics

Message from the Guest Editors

As global climate change intensifies and the need for energy transitions becomes more urgent, the field of climate and energy finance emerges as a significant area of focus. Traditional financial theories and practices are inadequate in addressing complex issues such as financing new energy projects and assessing climate risks. As countries advance towards carbon neutrality goals, more money is being invested in relevant industries. Determining how to optimize resource allocation, manage financial risks, and innovate financial instruments to support sustainable development has become a critical issue for both academia and the industry. This Special Issue aims to compile cutting-edge theories, empirical studies, and innovative practices to explore effective models of financial support for climate and energy transitions and provide knowledge to facilitate the creation of a sustainable financial system.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
