

Special Issue

Advances in Sustainable Supply Chain Management and Operations Management

Message from the Guest Editor

Sustainable supply chain management (SSCM) and operations management (OM) have become considerably important in the context of global environmental challenges and regulatory and consumer pressures for better ethical practices. SSCM integrates environmental, social, and economic objectives into supply chain activities, while OM focuses on efficiently transforming efforts and inputs into productions and outputs. They aim to balance productivity with sustainability across the entire value chain (Sarkis, 2019; Seuring and Müller, 2008). This Special Issue will expand the existing literature through its interdisciplinary nature. It will build upon theories such as the Resource-Based View (Shibin et al., 2020) and Triple Bottom Line (Adwiyah et al., 2023), offering frameworks for sustainable business practices. In addition, this issue will also include empirical implementation related to environmental issues, social issues, and digital transformation toward sustainability (see, for example, Seuring et al., 2022). Both practitioners in companies and academics will find the Special Issue useful, as it will outline major lines of research in the field and stimulate further progress.

About the Journal

Message from the Editor-in-Chief

I encourage you to contribute a research or comprehensive review article for consideration for publication in *Sustainability*, an international Open Access journal which provides an advanced forum for research findings in areas related to sustainability and sustainable development. *Sustainability* publishes original research articles, review articles and communications. I am confident you will find the journal contributes to enhancing understanding of sustainability and fostering initiatives and applications of sustainability-based measures and activities.

Editor-in-Chief

Prof. Dr. Marc A. Rosen

Faculty of Engineering and Applied Science, University of Ontario
Institute of Technology, Oshawa, ON L1G 0C5, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE and SSCI (Web of Science), GEOBASE, GeoRef, Inspec, RePEc, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Environmental Studies) / CiteScore - Q1
(Geography, Planning and Development)
